Education

SR University, Warangal

Aug 2023 – May 2027

Bachelor of Technology in Computer Science and Engineering, CGPA: 9.3

Courses: Data Structures, Operating Systems, Discrete Mathematics, Theory of Computation, Computer Networks, Design Analysis of Algorithm, Linear Algebra and Calculus.

Resonance Jr. College, Hanamakonda

June 2021 – Mar 2023

Intermediate Education, TSBIE, CGPA: 8.61

Courses: Mathematics, Physics, Chemistry, Sanskrit, English.

Internship / Experience

Teaching Assistant — Bites and Bytes Programming Institute

April 2024 – July 2024

- Assisted students with C, Python, and Java concepts during weekend mentoring sessions.
- Helped explain DSA topics and debug code during lab practice sessions.

Internship - NITW: Anomaly Detection, Implemented FL-based IoT Architecture. *May 2025 – July 2025*

- Prototype-based project on six-layered IOT Architecture: Edge, Gateway, Fog, Proxy, Cloud, Application.
 - Implementing **homogeneous federated learning** into the architecture using a customized architecture of Transformers and Autoencoders for the 6-layer IOT architecture.
 - Focusing on data preprocessing, attack classification, and XAI, including visualization tools.
-

Projects

Project: Multi-Client Communication System (Java Networking).

- Built a real-time chat system with a GUI-based client and server control panel using Java Swing.
- Implemented multi-threaded socket programming to enable simultaneous communication between multiple clients.
- Designed direct messaging, broadcasting, and client list features with custom message framing protocol.

Project: Career Guidance Website for Rural Students

- Developed a page where students can find useful information regarding the available streams.
- Interacted and helped rural students (govt. students), the website contains all the available streams after 10th, 12th, and graduation. Also mentioned entrance exams for renowned institutions for the 12th graders.
- Hosted the website on GitHub pages: [Click Here](#).

Project: Anomaly Detection Using Reinforcement Learning.

- Designed a custom RL environment to model IOT network traffic using the WUSTL IIOT 2021 dataset.
 - Achieved 98% accuracy, 88% precision, 100% recall, and 93% F1-score, highlighting the effectiveness of DQN in high-recall anomaly detection tasks.
-

Technical Skills

Languages C, C++, Java, Python, PHP

Libraries NumPy, Pandas, Matplotlib, Scikit-Learn, Seaborn, Sklearn, Joblib

Frameworks Pytorch, Tensorflow

Web HTML, CSS

Databases & Tools Oracle, MySQL, JDBC, GitHub

Networking Java Networking, Multi-threading, Java Swing, Java NIO

Certifications C Programming (NPTEL, IIT Kanpur), Data Analysis (IBM)
